18. Limited Supplies.

Most trailers come equipped with oversized tanks - approximately forty (40) gallons of fresh water, ninety (90) gallons of grey and black water holding tank capacity, 8 pounds pounds of propane, and two (2) 12 volt house batteries. It is your responsibility to ensure that these resources last your entire rental period. We will not provide customers additional water, holding tank capacity, propane, or batteries during their rental period. Many Loves and Pilots have RV dump stations and propane refills.

19. Fuel

When filling the RV only use 85 unleaded fuel. **To refill you must turn off the propane.** Most fill stations will only let you fill \$75 at a time. You can fill more if you do another transaction typically. The RV should be returned with the same amount of fuel that it was delivered in.

20. Generator

The RV comes equipped with a gasoline powered generator. The generator supplies 110 volt power to the outlets in the RV. The generator also supplies power to the RV's microwave oven and roof air conditioner. The generator can be used to recharge the RV's two 12 volt batteries. The RV's generator runs off the RV's gas tank. You must have at least $\frac{1}{4}$ a tank to run the generator. Once it reaches a $\frac{1}{4}$ a tank the generator shuts off until it is refueled. We try to have at least a half a tank to full tank when rented to you. It is your responsibility to refuel the gas tank to the level you will need. Fuel at time of rental is _____ full.

21. Set-Up Check-List

1. Put the RV in park and engage the parking brake.
2. Turn off the ignition but turn the ignition back on to engage the battery.
3. Go to the auto-leveling controls by the back door. Chuck the wheels.

5. If the AUTO-LEVEL fails to complete use the leveling blocks in the outside compartment by the driver's door to complete the process. Place them under the auto level system.
6. Remove the keys from the ignition.
7. If plugging in, use the surge protector to first check the line. Plug in the surge protector. Turn on the 30 AMP power. Wait for the green light. Turn off the power and then plug in the surge protector and then the RV. Turn the 30 AMP power switch back on.
8. Connect the water using the water pressure regulator and water filter. Turn the dials to city connection. Make sure the water pump is on.
9. If using sewer, use the elbow connector and then the sewer line. We keep the lines closed until the grey is filled and then flush the black and then the grey.
10. Check the entire inside length of the slide to make sure it is clear of any objects. Also, check the outside to make sure you have 3 feet of clearance to open the slide.
11. Open the slide.
12. Set-up complete!

22. Appliances

The A/C, generator, awning, radio, microwave, television, jacks, etc. are convenience items. If any malfunctions should occur with any of these items, no compensation will be made to you. If this is red and beeping, you need to exit the RV and turn off the gas. Once the gas is off and it is safe to enter the RV, you should open all the windows and run all the fans. To turn on the stove you hold the far left knob in and turn the dial you want on at the same time.

25. Water Usage and Toilet

The RV motorhome is equipped with a gray water holding tank that collects water from the shower and sinks. The black water holding tank collects water from the toilet. If Renters are staying in a site without full hookups, they should use water sparingly so as not to exceed the tanks holding capacity. We suggest using the shower facilities in the campground bathhouse. If the holding tanks are filled to capacity, there will be a fee of \$50.00 for us to empty the tanks after the rental. Many Pilots and Loves offer dump stations as well as campgrounds. The water or toilets cannot be used once the gray and or black tank capacity is exceeded. **ONLY RV TOILET paper goes down the RV TOILET.**
